Course Code: CSA0509

Slot: A

Course Name: Database Management Systems

Course Faculty: Dr. Kesavan R

Project Title: Smart Water Utility Consumption, Billing, and Complaint Management System

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description)

I contributed to the development of the **Smart Water Utility Consumption, Billing, and Complaint Management System** by working on the database design and implementation. I created and organized tables for customers, water connections, meter readings, billing, payments, and complaints, and established the required relationships between them. I developed SQL queries to store, update, and retrieve data, and worked on the calculation of water consumption and bill amounts based on meter readings. I also contributed to complaint tracking, payment status management, testing, error correction, and documentation. Through this work, I helped make the system more accurate, organized, and efficient for managing water utility services.
